Design

User centric design
Accessibility
Design systems
Wire-framing
Prototyping
User research
Usability studies
Figma
Miro
Google Analytics

Coding

HTML/CSS/Javascript
React/ Typescript
NextJS
Python & SQL
GitHub/Version Control

Soft Skills

Communication
Collaboration/Team working
Team leading
Empathy
Problem solving
Flexibility
Project management

Hobbies

Gym/Health and Fitness
Sports - Football, martial arts
Video Games
Archery

Experience

UX/UI Engineer and Front End Software Engineer, Ciptex, Manchester/ Remote - (June 2021-Present)

- Responsible for designing and building innovative solutions for private companies, public bodies, NGOs and not-for-profits

- Conducting user research to understand user needs, using appropriate methods and tools

- Translating research into actionable design ideas - paper based sketches, wireframes, low and hi-fidelity prototypes

- Building and maintaining design systems, using React/Typescript predominantly, in conjunction with Storybook, and deploying as npm packages for use in software. Also, usage of UI component frameworks when required, for example Material UI, ShadCN, NextUI, Mantine

- Building front end applications, interfaces, software, and websites, using agile methodology across multi-disciplinary teams. Built using React with Typescript predominantly, but also using NextJS, HTML/CSS/Javascript - dependant on project requirements and client preferences

- Usage of build tooling for production of applications and deployments. A sample of tools used include - Npm, Vite, Webpack, Create React App, Rollup.js

- Internal and external testing, using a variety of tools and methodologies including test scripts, user flow journey maps, and end user testing via lab testing, usability surveys, remote usability testing and focus groups

- Post live reviews with clients and internally, and a focus on CI/CD methodology post go-live

Achievements

- Project completion of a web chat and agent side communication platform for Shelter, the UK housing advice and advocacy body. Web chat can be seen live on url https://england.shelter.org.uk/get_help/webchat. This service has helped increase of 85% in contact handling capacity

- Project completion of a WhatsApp flow building platform for UNHCR, enabling them to rapidly deploy contact centres and relief efforts in disaster zones around the world at a moments notice

- Project completion of an agency management system for NFCC (National Foundation for Credit Counselling), an American not-for profit debt advice service

Education

BSc in Web Design & Development with First Class honours from Edge Hill University

Key modules - User Experience, Usability Testing & Data Analysis, Server and Client-Side Scripting
